

DES. # 1700012

## LEGAL NOTICE OF PLANNED IMPROVEMENT

The Indiana Department of Transportation (INDOT) is developing plans for proposed SR 58 small structure replacement, 1.95 miles west of I-65 in Bartholomew County.

The purpose of this project is to provide a structurally-sufficient waterway crossing, improve safety of the crossing, and improve the hydraulic efficiency of the existing crossing. The need for the project is evidenced by the deterioration and structural deficiencies of the existing culvert.

The project proposes to replace the existing structure with a new reinforced concrete box structure. The roadway will have two, 10-foot lanes, a 2-foot shoulder on the south side of the roadway, and a 4-foot shoulder on the north side of the roadway.

The proposed construction of this project will require 0.77 acre of new permanent right-of-way. No temporary right-of-way is required for this project.

The maintenance of traffic (MOT) plan proposes closing SR 58 for approximately 60 days. An official state route detour utilizing I-65, SR 11, and SR 258 will be used during construction. Local roads may be used by local traffic. Access to all properties will be maintained throughout construction. School corporations and emergency services will be notified of closures prior to construction. The proposed start of construction is Spring 2022.

The cost associated with this project is approximately \$618,500 which includes preliminary engineering, right-of-way, construction with both federal and state funds anticipated to be used. The Federal Highway Administration (FHWA) and INDOT have agreed this project falls within the guidelines of a Categorical Exclusion (CE) Level 2 environmental document. Preliminary design plans along with the CE are available for review on the following website:
